Information about Prevailing Wage Schedules for Awarding Authorities and Contractors

- This wage schedule applies only to the specific project referenced at the top of this page and uniquely identified by the “Wage Request Number” on all pages of this schedule.
- An Awarding Authority must request an updated wage schedule from the Department of Labor Standards (“DLS”) if it has not opened bids or selected a contractor within 90 days of the date of issuance of the wage schedule. For CM AT RISK projects (bid pursuant to G.L. c.149A), the earlier of: (a) the execution date of the GMP Amendment, or (b) the bid for the first construction scope of work must be within 90-days of the wage schedule issuance date.
- The wage schedule shall be incorporated in any advertisement or call for bids for the project as required by M.G.L. c. 149, § 27. The wage schedule shall be made a part of the contract awarded for the project. The wage schedule must be posted in a conspicuous place at the work site for the life of the project in accordance with M.G.L. c. 149 § 27. The wages listed on the wage schedule must be paid to employees performing construction work on the project whether they are employed by the prime contractor, a filed sub-bidder, or any sub-contractor.
- All apprentices working on the project are required to be registered with the Massachusetts Department of Labor Standards, Division of Apprentice Standards (DLS/DAS). Apprentice must keep his/her apprentice identification card on his/her person during all work hours on the project. An apprentice registered with DAS may be paid the lower apprentice wage rate at the applicable step as provided on the prevailing wage schedule. **Any apprentice not registered with DLS/DAS regardless of whether or not they are registered with any other federal, state, local, or private agency must be paid the journeyworker's rate for the trade.**
- The wage rates will remain in effect for the duration of the project, except in the case of multi-year public construction projects. For construction projects lasting longer than one year, awarding authorities must request an updated wage schedule. Awarding authorities are required to request these updates no later than two weeks before the anniversary of the date the contract was executed by the awarding authority and the general contractor. For multi-year CM AT RISK projects, awarding authority must request an annual update no later than two weeks before the anniversary date, determined as the earlier of: (a) the execution date of the GMP Amendment, or (b) the execution date of the first amendment to permit procurement of construction services. Contractors are required to obtain the wage schedules from awarding authorities, and to pay no less than these rates to covered workers. The annual update requirement is not applicable to 27F “rental of equipment” contracts.
- Every contractor or subcontractor which performs construction work on the project is required to submit weekly payroll reports and a Statement of Compliance directly to the awarding authority by mail or email and keep them on file for three years. Each weekly payroll report must contain: the employee’s name, address, occupational classification, hours worked, and wages paid. Do not submit weekly payroll reports to DLS. A sample of a payroll reporting form may be obtained at <http://www.mass.gov/dols/pw>.
- Contractors with questions about the wage rates or classifications included on the wage schedule have an affirmative obligation to inquire with DLS at (617) 626-6953.
- Employees not receiving the prevailing wage rate set forth on the wage schedule may report the violation to the Fair Labor Division of the office of the Attorney General at (617) 727-3465.

### DESIGN

For buildings designed with gutters: seamless aluminum gutters should be sized to adequately manage the rain water collected by the roof and to properly fit the scale of the building.

Attach gutters with brackets (where metal clad roof fascia is installed). Specify strap type hangers with screw fasteners; avoid spikes and ferules.

Pay special attention to details to avoid water getting behind the gutters. Typically the front edge of the gutter should be at least  $\frac{1}{2}$ " below the plane of the roof.

Locate downspouts so that water runs away from the buildings. Install downspout strap hangers using a minimum .032" thickness straps, screwed, (not nailed) into building sheathing at 24" o.c. for the lowest 8' of downspout and at 48" o.c. for the upper portions. Do not use cast aluminum spike type downspout hangers.

# DESIGN AND CONSTRUCTION GUIDELINES AND STANDARDS

DIVISION 7 • THERMAL & MOISTURE PROTECTION

## 07 45 00 • GUTTERS AND DOWNSPOUTS

Consider lawn and landscape maintenance and locate downspouts and splash blocks in locations least likely to impede the path of lawn mowers

Where possible, downspouts from upper roofs should not be placed to discharge directly onto lower roofs, but rather should carry water in downspouts all the way down to grade.

When re-using existing underground storm water drainage systems with new replacement gutters, verify that the underground system is functional before installing new downspouts into hubs. Where system is not functioning properly, install downspouts with splash blocks in lieu of the underground system

### MATERIALS

Seamless aluminum gutters are to be 6" gutters with ogee profile.

Size downspouts to match gutter size and to manage rainwater design load.

.027" thick aluminum drip edges at all eaves and rakes.

Provide aluminum gutters in .032" thickness and aluminum downspouts in .024" thickness.

Do not use wood gutters.

Do not use plastic gutters.

### EXECUTION

Follow manufacturer's recommendations and standard professional practice.

When installing gutters into underground storm drainage systems, include adequate cleanouts at the locations where the downspouts tie into the underground systems and at drywells. These locations should be designed to facilitate future maintenance and to eliminating obstructions at the connections where they are most likely to occur.
